

FOR IMMEDIATE RELEASE

PROCESS TECHNOLOGY UPDATES LUFTRAN DI WATER HEATER TO BETTER SERVE CUSTOMERS

MENTOR, OHIO (October, 2016) Process Technology has updated the Lufran Deionized Water Heater to better serve the needs of its customers in a world of quickly changing technology and ever-increasing purity and precision.

The updated Lufran heaters possess the same ultrapure fluid paths and same superior performance as the previous versions, but now include modernized user interfaces, updated circuitry, and improved configurability. Please see attached presentation for the details of this update.

The previous version of the Lufran will be available for a limited time. Please contact Process Technology as soon as possible with any inquiries about these models.
